

Augmented Reality

1

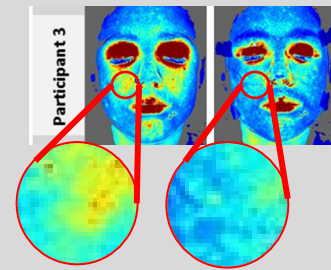

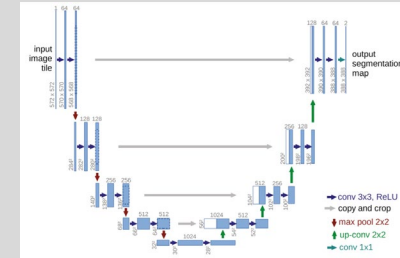

HoloLens + Haptic input device for AR medical 3D modelling

3D scanner & AI

2

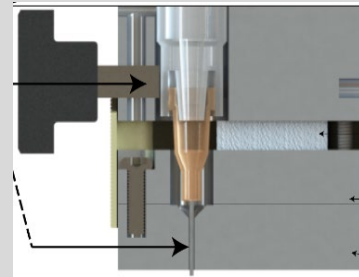

Clinical 3D scanner H/W & S/W development
AI based image analysis

3D Printer H/W

3

3D printer engineering, 3D high temperature plastics, photocurable resins, micron-scale architectures

Metamaterials

4

3D printing H/W for metamaterials, S/W and FEA of structures, anatomical and force sensing, Soft robotics for dynamic bioreactor design
