

# Cyclists and Automated Vehicles

314 Australian cyclists told us about sharing the road with Fully Automated Vehicles.

61% of cyclists AGREED that  
"I would feel safe to ride a  
bicycle on roads in the presence  
of Fully Automated Vehicles"

51% AGREED that  
"Fully Automated Vehicles  
will be able to effectively  
interact with other vehicles,  
pedestrians and cyclists"

Full results of this study will be circulated once published.  
A similar study is underway relating to pedestrian safety.
