

# Why did my car stop doing that?

Partial and conditional automated vehicle sensors could be affected by **technical failure due to changing driving environments**.

**Mode Confusion** would then occur as the vehicle's level of automation downgrades to a lower level of operation.

Humans will be **required to remain fallback-ready** to retake control of their vehicles.

1,563 drivers from Australia, France and Sweden reported some level of AGREEMENT with the statement **"I would be worried about a technical failure"**?
