T3: Today's Teaching Tip

TRY THIS ON FOR SIZE*

- <u>Did you try</u> asking students to send you links to pictures and videos that illustrate unit-related concepts and phenomena?
- After your students work through a calculation in class, <u>did</u>
 <u>you try</u> asking them to brainstorm reasons the result might
 be different if it were measured in a lab or in practice?
- <u>Did you try</u> holding some virtual office hours?

Why should you give these teaching ideas a go?

* For benefits of these and other ideas, read:
